

DBT-001

DAB+/FM/Bluetooth® Radio

The DBT-001 is one of a new generation of radios developed by Roth AV.

Delivering true high-fidelity sound the DBT-001 combines FM and DAB+ radio receivers and Bluetooth® functionality allowing you to stream music from your Bluetooth® device (mobile 'phone, tablet, etc.) to the radio's built-in full range speaker. There's also a headphone output and an auxiliary input, allowing you to play music from an external source such as a CD player or MP3 player.

All functions are accessed from the two scroll wheels and buttons provided on the front panel or from the remote control supplied. For convenience there are 4 different brightness levels for the LCD screen so the radio can sit comfortably in your bedroom or in brighter environments within your home. The digital clock function also has two separate alarm settings and there's even a USB output so that you can charge your mobile device.

Beautifully constructed utilising high-quality materials, the DBT-001 is available in high-gloss white, high-gloss black and walnut finishes. The rear panel is also ported to allow for greater bass response, so that the audio reproduction is superbly balanced and precise.

Beautifully designed in Great Britain.

DBT-001 Specifications
